events!

# POLL

What are you?

- Developer / Engineer
- Scientist / Analyst / Statistician / Mathematician
- Combination of the Above
- Other

# POLL

What's your level of experience with the topic?

- Little to no exposure to deep learning
- Some deep learning theory
- Deep learning theory + experience with a deep learning library
- Deep learning theory + experience with TensorFlow/Keras

# Deep Learning Fundamentals

1. The Unreasonable Effectiveness of Deep Learning
2. Essential Deep Learning Theory
3. Deep Learning with TensorFlow 2

# Deep Learning Fundamentals

## Part 1:

### The Unreasonable Effectiveness of Deep Learning

- Intro to Neural Networks and Deep Learning
- Deep Learning Families
- Deep Learning Libraries

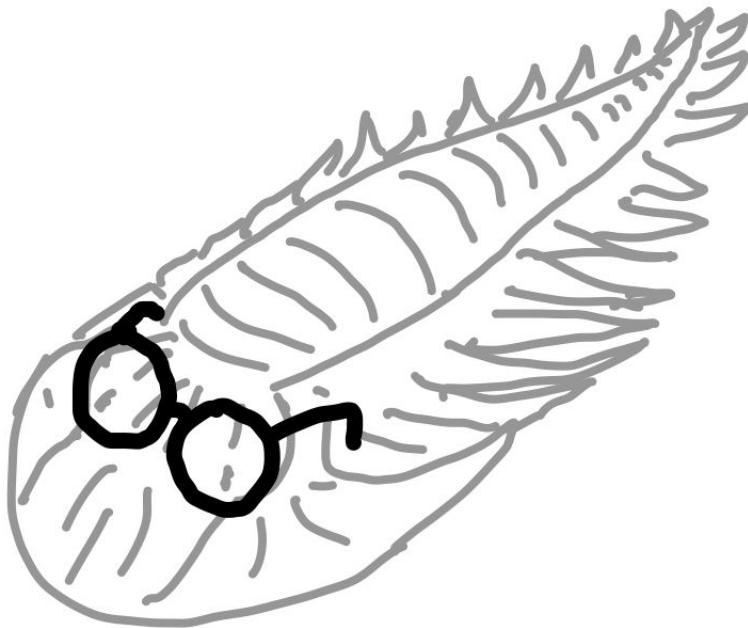

# Deep Learning Fundamentals

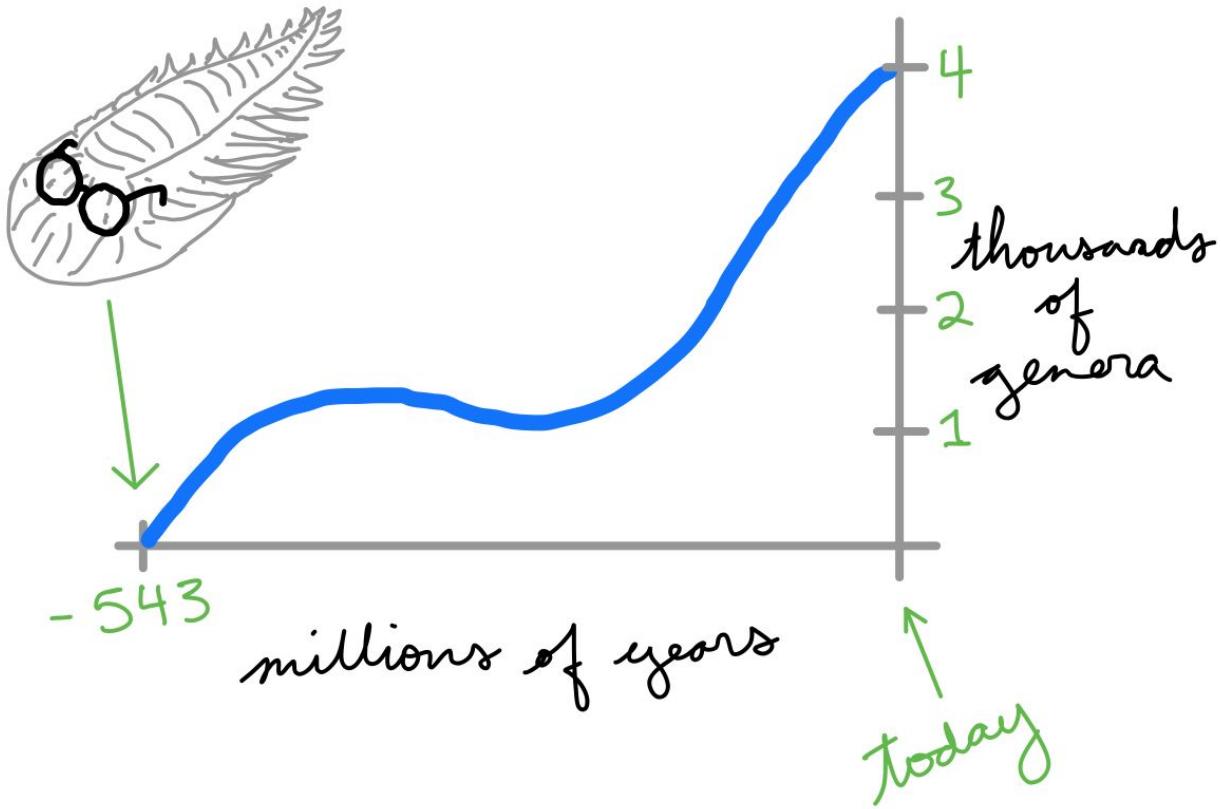

## Part 1:

### The Unreasonable Effectiveness of Deep Learning

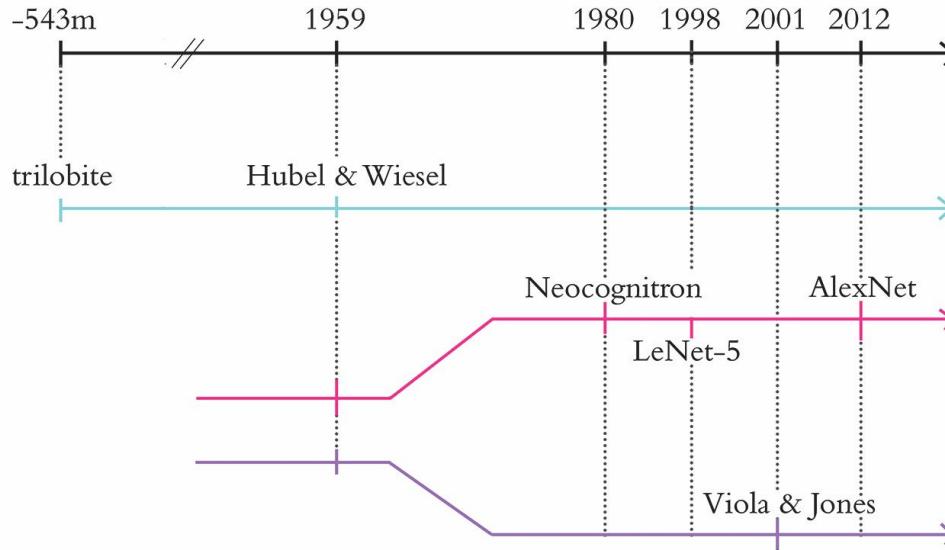

- **Intro to Neural Networks and Deep Learning  
(Chapter 1)**
- Deep Learning Families
- Deep Learning Libraries

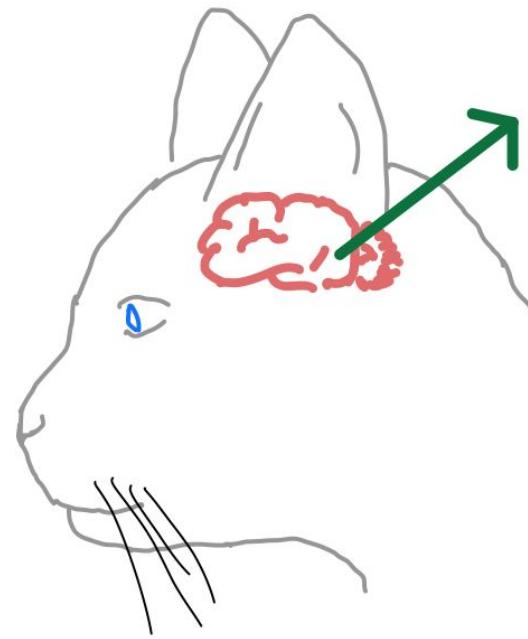

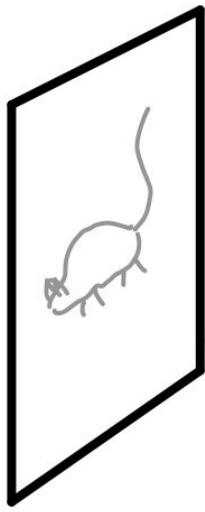

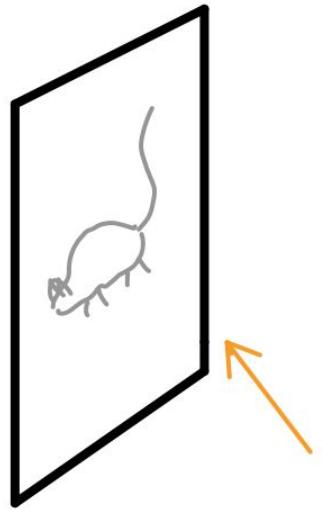

# Case Study: The History of Vision

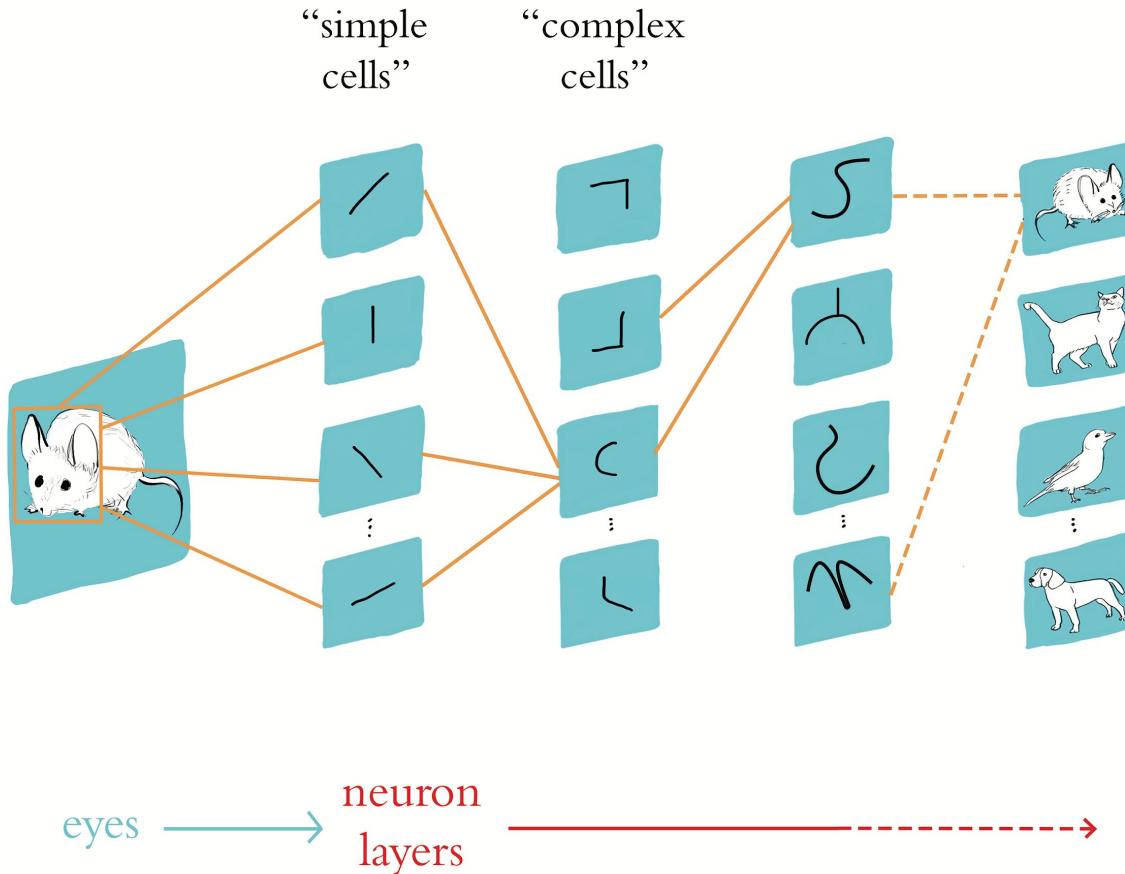

- overall timeline
- biological vision
- deep learning
- traditional ML

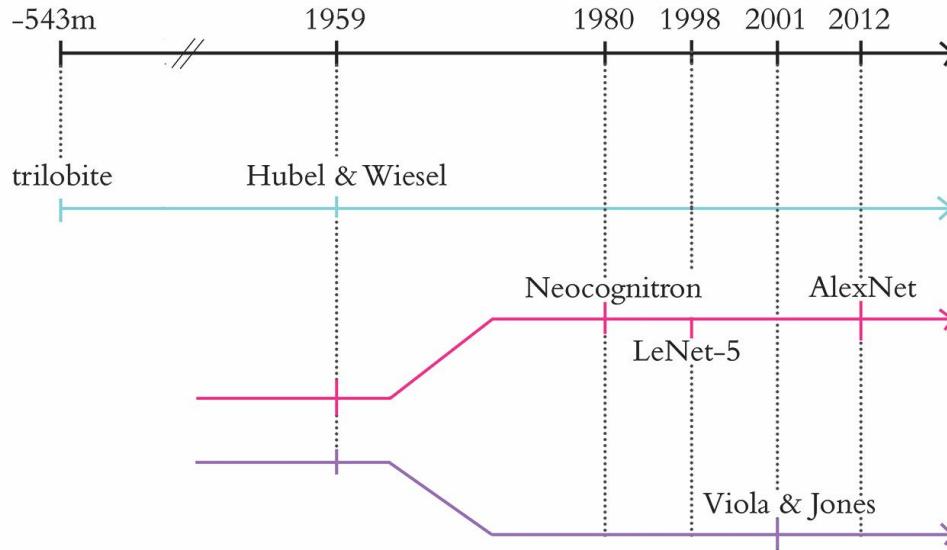

# Case Study: The History of Vision

- overall timeline
- biological vision
- deep learning
- traditional ML

# Neocognitron (Fukushima, 1980)

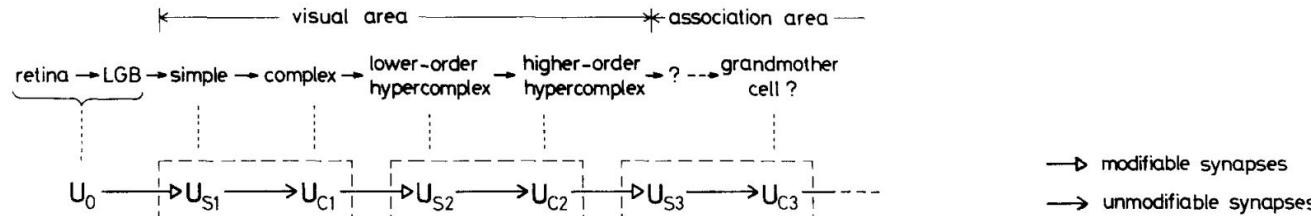

Fig. 1. Correspondence between the hierarchy model by Hubel and Wiesel, and the neural network of the neocognitron

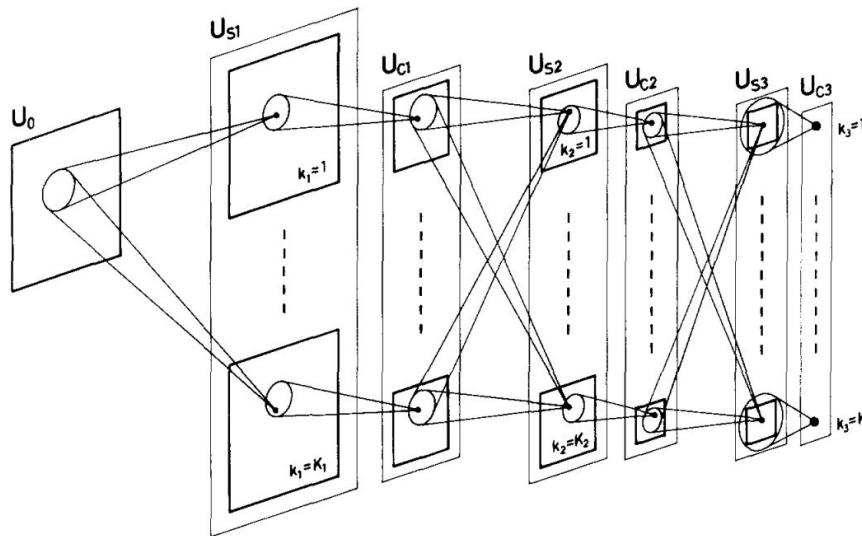

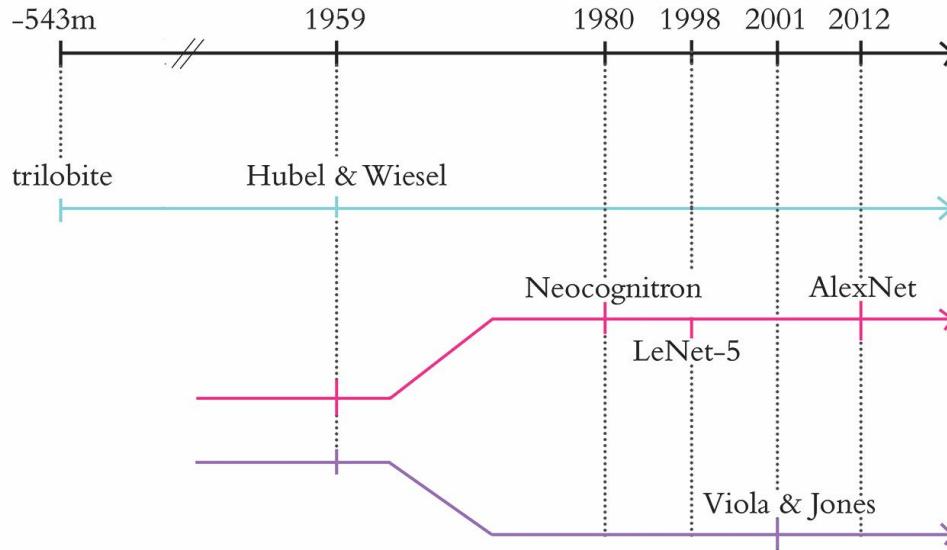

Fig. 2. Schematic diagram illustrating the interconnections between layers in the neocognitron

# Case Study: The History of Vision

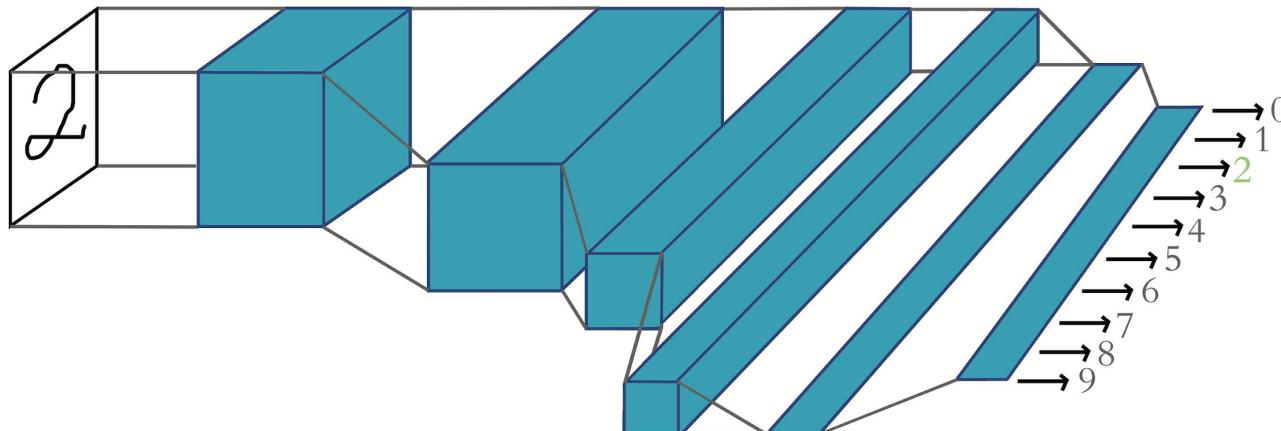

- overall timeline
- biological vision
- deep learning
- traditional ML

# Yann LeCun and Yoshua Bengio

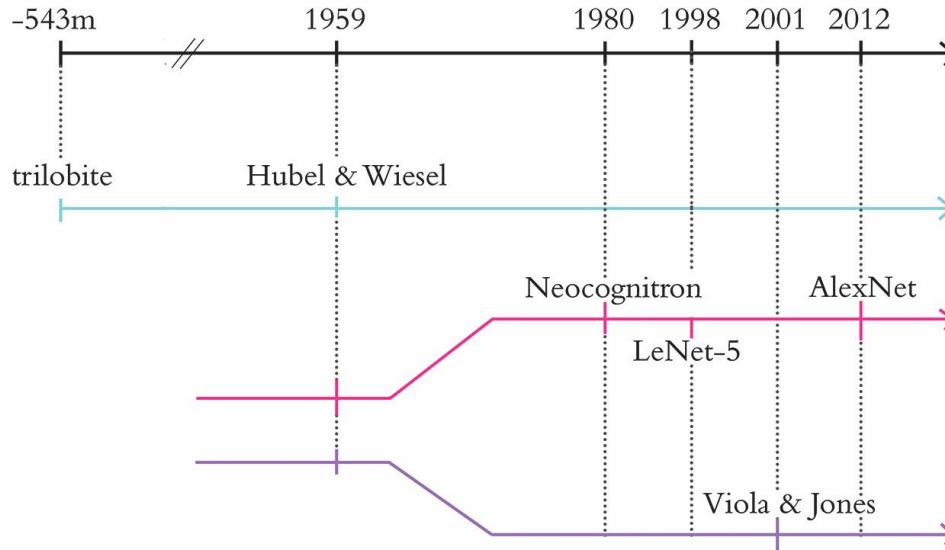

# LeNet-5 (LeCun et al., 1998)

input image → large simple features → smaller more complex features → probability outputs

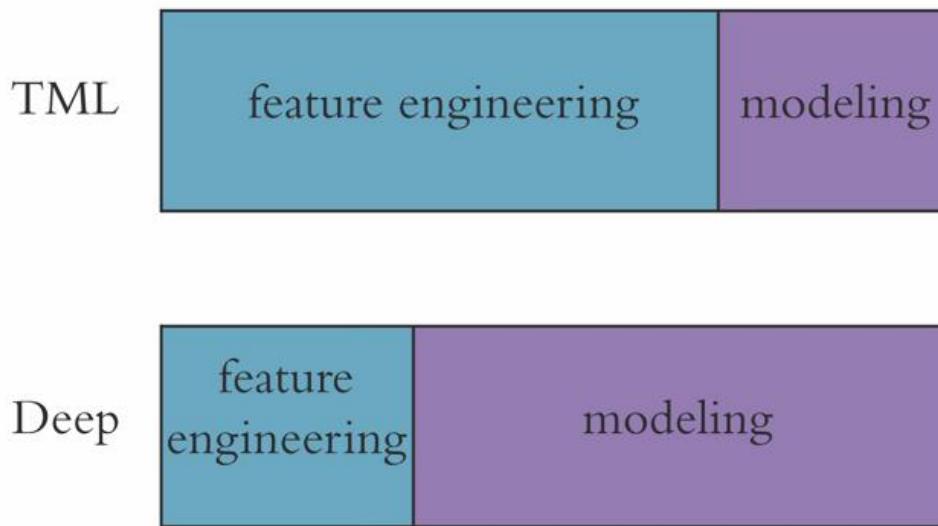

# Case Study: The History of Vision

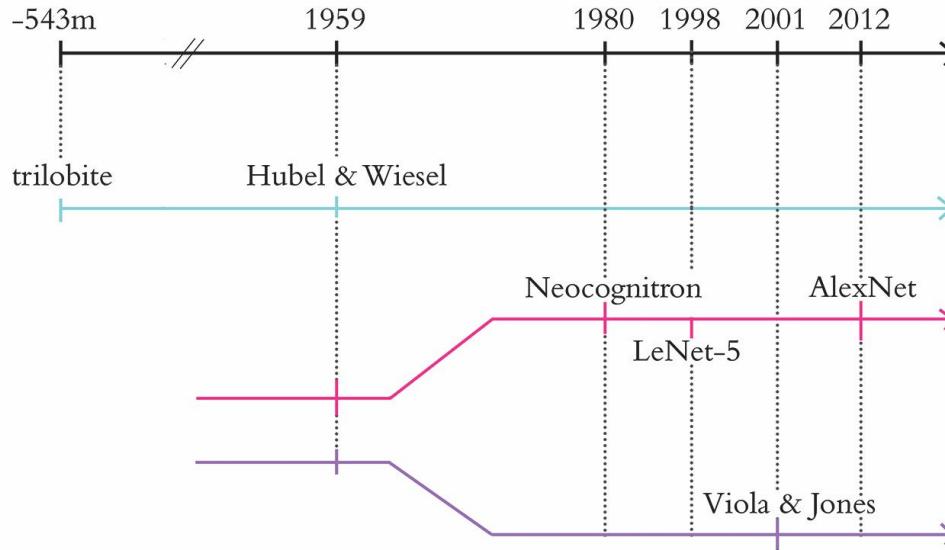

- overall timeline
- biological vision
- deep learning
- traditional ML

# Traditional ML vs Deep Learning

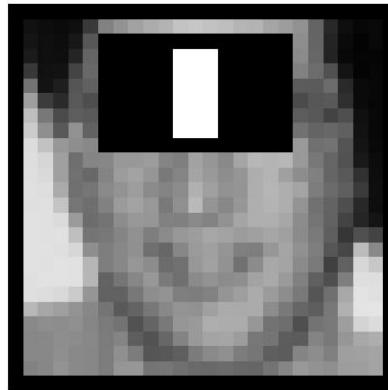

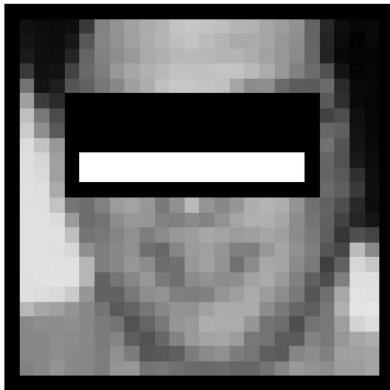

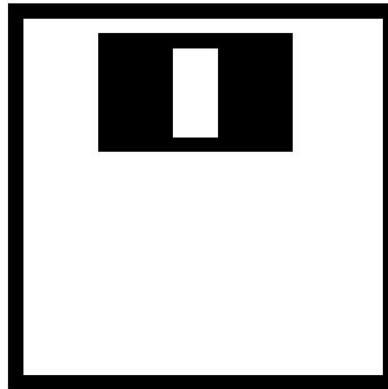

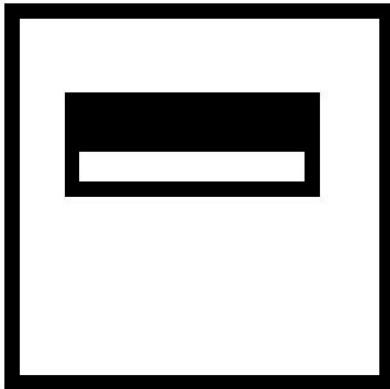

# Case Study: The History of Vision

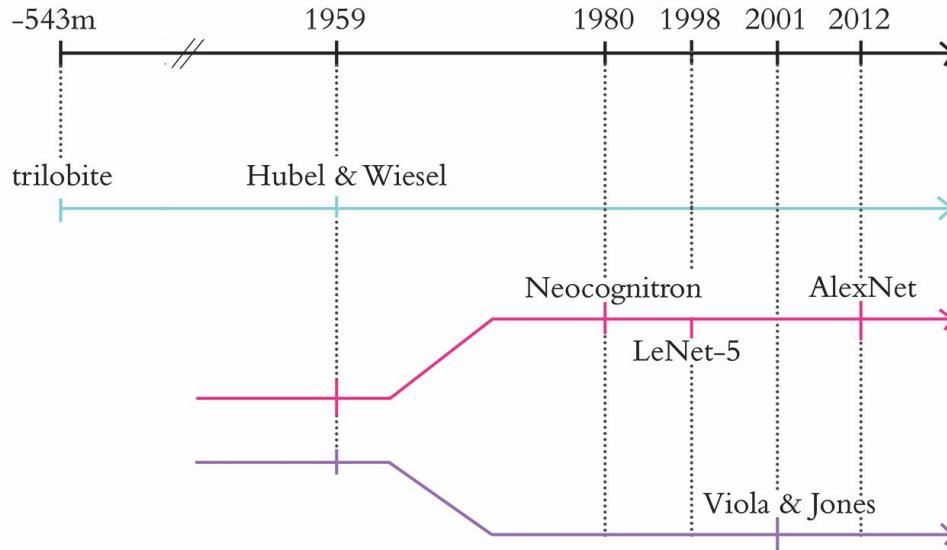

- overall timeline
- biological vision
- deep learning
- traditional ML

# Viola & Jones (2001)

# Case Study: The History of Vision

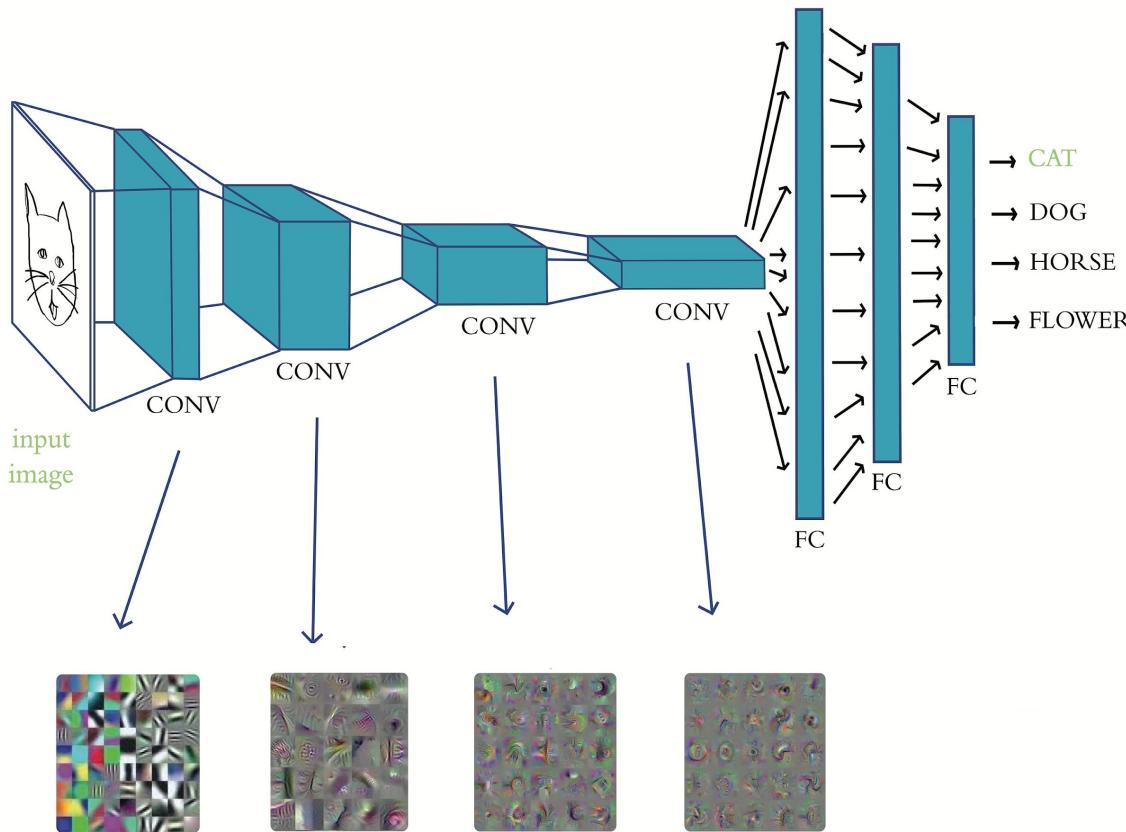

- overall timeline
- biological vision
- deep learning
- traditional ML

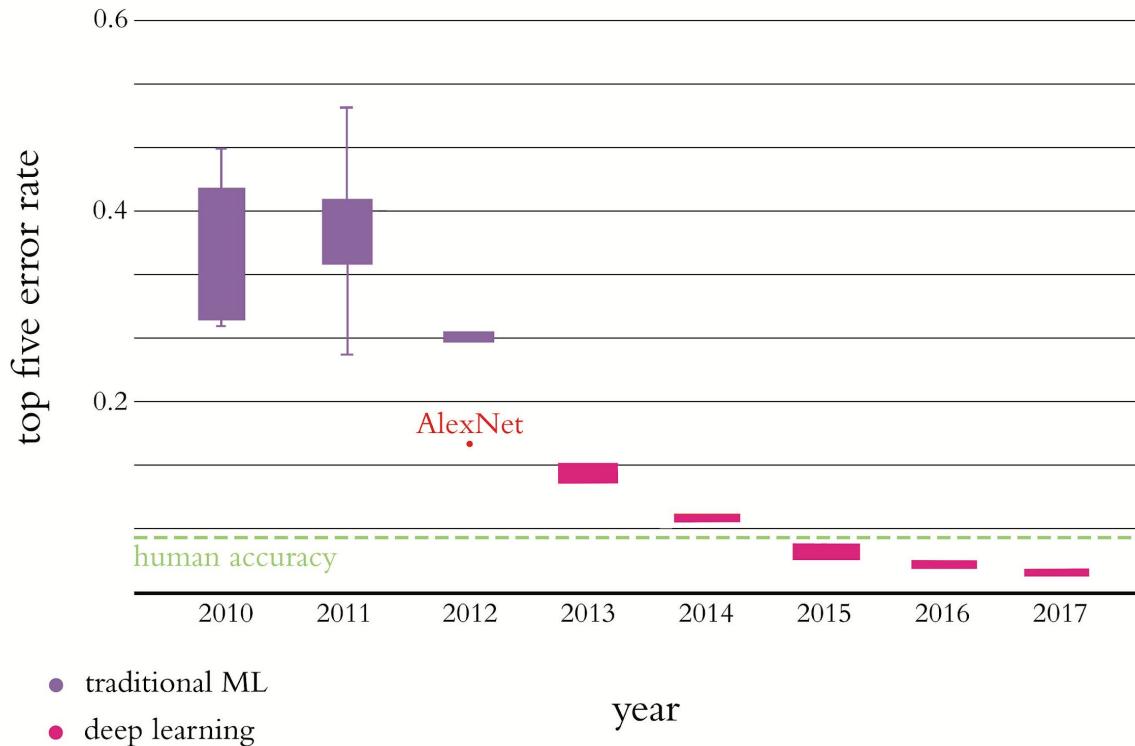

# Geoff Hinton

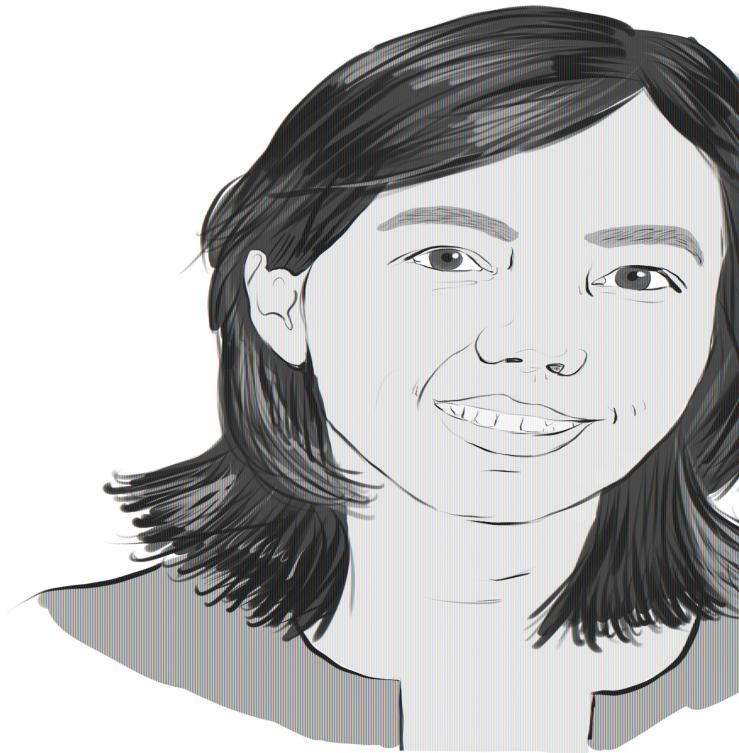

# AlexNet (Krizhevsky et al., 2012)

# ILSVRC Results

# Fei-Fei Li

# POLL

If a voice recognition algorithm is fed audio of speech as inputs, given corresponding text as the outputs (labels) to learn, and no features are explicitly programmed, is this a:

- Traditional Machine Learning Algorithm
- Deep Learning Algorithm
- I Don't Know

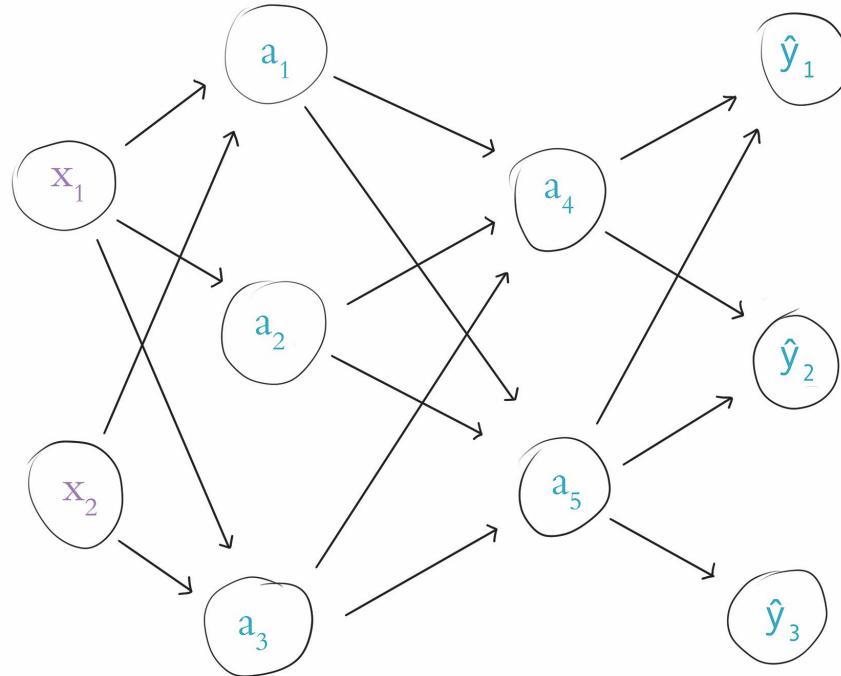

# Deep Learning Fundamentals

## Part 1:

### The Unreasonable Effectiveness of Deep Learning

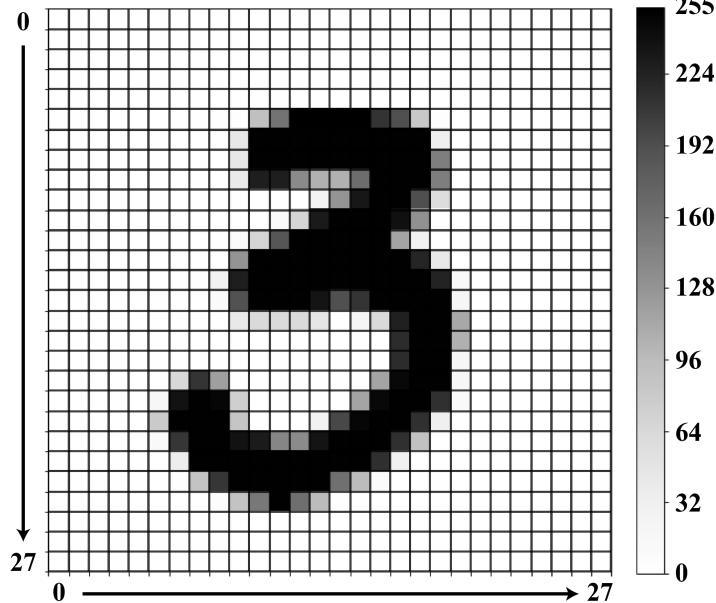

- Intro to Neural Networks and Deep Learning
- **Deep Learning Families (*Chapters 2-4*)**
- Deep Learning Libraries

# Dense Networks

# The Cart Before the Horse (*Chapter 5*)

5 0 4 1  
9 2 1 3  
1 4 3 5

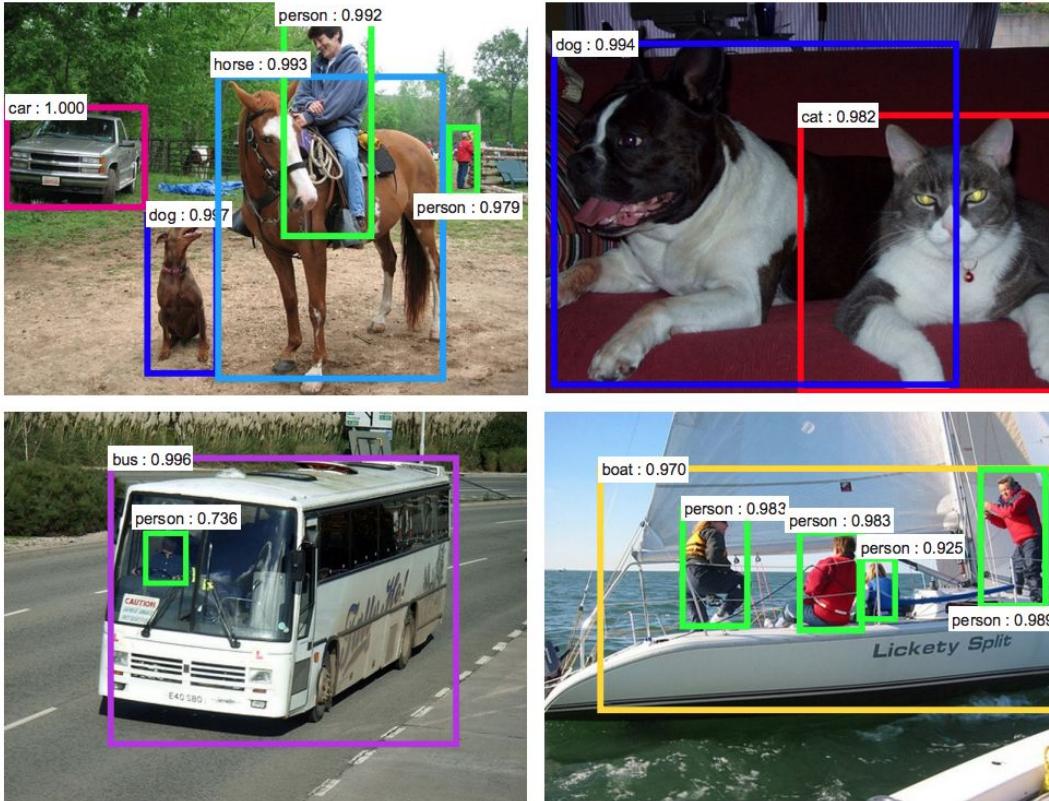

**interactive Colab demo:** *Shallow Net in TF 2.0* ([bit.ly/shallowTF](https://bit.ly/shallowTF))  
**GitHub repo:** [github.com/jonkrohn/tf2](https://github.com/jonkrohn/tf2)

# ConvNets: Convolutional Networks

# ConvNets: Convolutional Networks

Ren et al. (2015)

# RNNs: Recurrent Neural Networks

# GANs: Generative Adversarial Networks

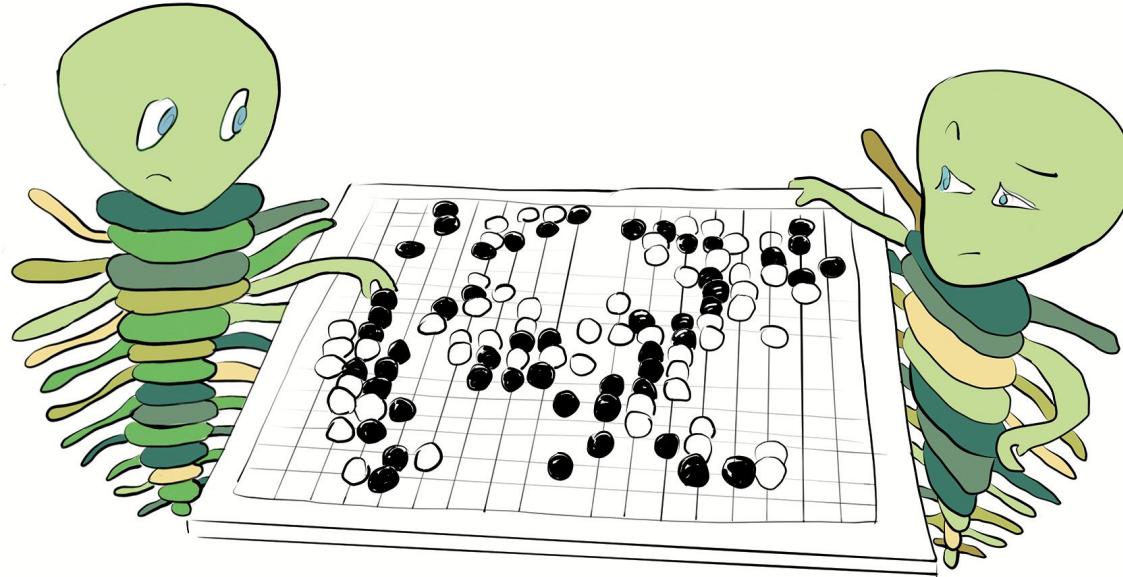

# GANs: Generative Adversarial Networks

Karros et al. (2018)

# Deep Reinforcement Learning

# Demis Hassabis and David Silver

# POLL

If you were designing an algorithm to learn to play Tetris by maximizing its score, which of these Deep Learning approaches would be most appropriate?

- Convolutional Neural Network
- Recurrent Neural Network
- Deep Reinforcement Learning
- Generative Adversarial Network

# POLL

If you were designing an algorithm to recognise tumours in medical images, which of these Deep Learning approaches would be most appropriate?

- Convolutional Neural Network
- Recurrent Neural Network
- Deep Reinforcement Learning
- Generative Adversarial Network

# POLL

If you were designing an algorithm to predict stock price movements based on time series data, which of these Deep Learning approaches would be most appropriate?

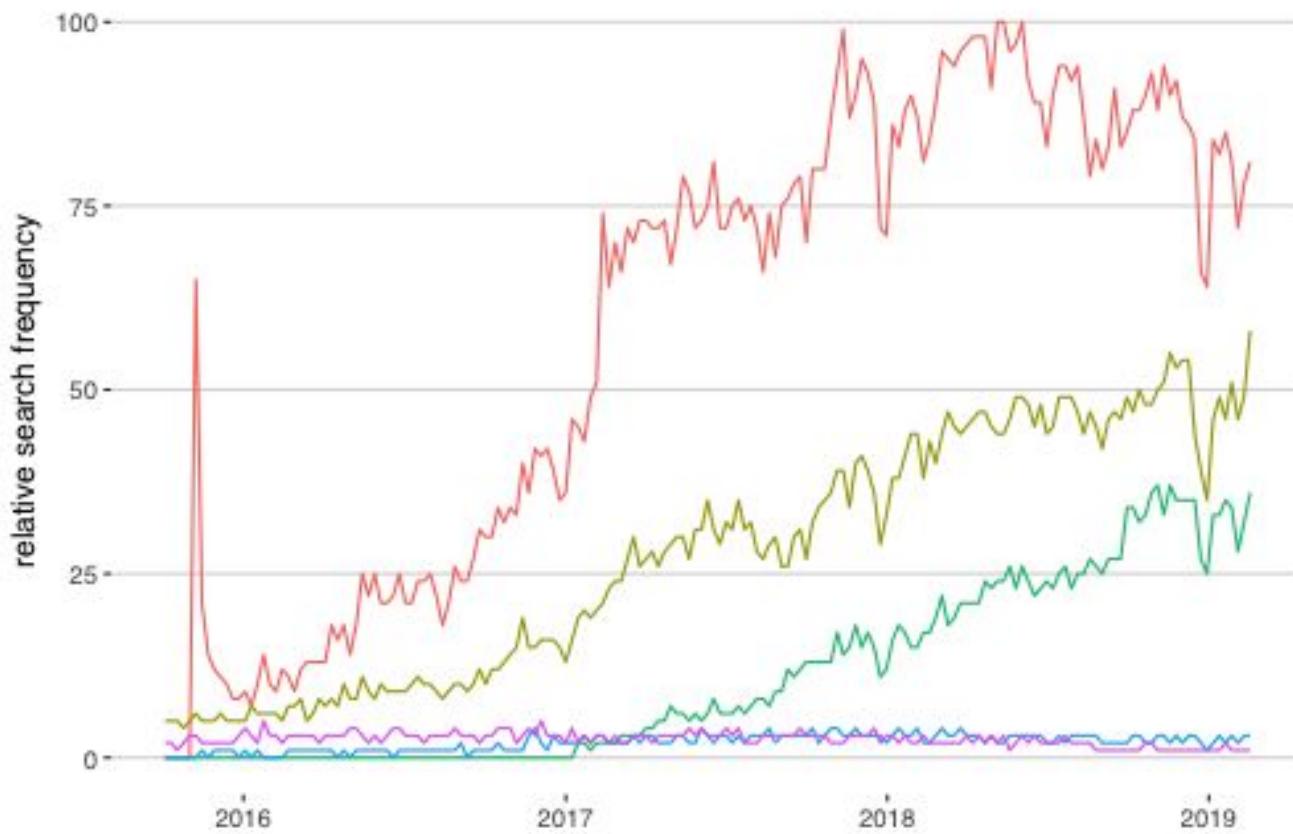

- Convolutional Neural Network
- Recurrent Neural Network
- Deep Reinforcement Learning
- Generative Adversarial Network

# Deep Learning Fundamentals

## Part 1:

### The Unreasonable Effectiveness of Deep Learning

- Intro to Neural Networks and Deep Learning
- Deep Learning Families
- **Deep Learning Libraries (Chapter 14)**

# Leading Deep Learning Libraries

	Caffe	Torch	MXNet	TensorFlow
<i>Language</i>	Python, Matlab	Lua, C	Python, R, C++ Julia, Matlab JavaScript, Go Scala, Perl	<b>Python, C, C++</b> Java, Go, JS, Swift <i>(Haskell, Julia, R, Scala, Rust, C#)</i>
<i>Programming Style</i>	Symbolic	Imperative	Imperative	Imperative ( <i>since 2.0</i> )
<i>Parallel GPUs: Data</i>	Yes	Yes	Yes	Yes
<i>Parallel GPUs: Model</i>		Yes	Yes	Yes
<i>Pre-Trained Models</i>	Model Zoo	Model Zoo	Model Zoo	<a href="https://github.com/tensorflow/models">github.com/tensorflow/models</a>
<i>High-Level APIs</i>		PyTorch	in-built	Keras
<i>Particular Strength</i>	CNNs	interactivity		production deployment

## PyTorch

“NumPy”, optimized for GPUs

dynamic auto-differentiation (autodiff)

debugging is easier

fast.ai API

TorchScript Just-In-Time compilation

## TensorFlow

ported to Python from C++

static computational graph (*historically*)

Keras API

more widely adopted

TensorFlow Serving, .js, Lite, tf.data, tf.io

**better for production deployments**

# Deep Learning Fundamentals

## Part 2:

### Essential Deep Learning Theory

- **Learning with Artificial Neurons (*Chapters 6-7*)**
- **TensorFlow Playground**

# “Whiteboarding”!

# Your Arsenal

## Neurons

- sigmoid
- tanh
- ReLU

# Your Arsenal

## Neurons

- sigmoid
- tanh
- ReLU

## Cost Functions

- quadratic cost

$$\sum_i (y_i - \hat{y}_i)^2$$

# Your Arsenal

## Neurons

- sigmoid
- tanh
- ReLU

## Cost Functions

- quadratic cost
- cross-entropy

# Your Arsenal

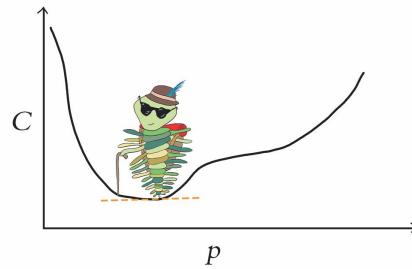

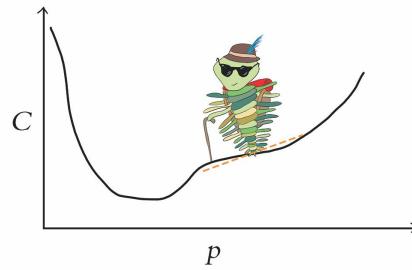

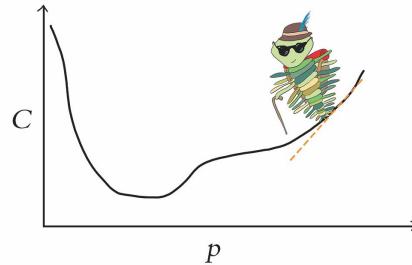

## Neurons

- sigmoid
- tanh
- ReLU

## Cost Functions

- quadratic cost
- cross-entropy

## Gradient Descent

# Your Arsenal

## Neurons

- sigmoid
- tanh
- ReLU

## Cost Functions

- quadratic cost
- cross-entropy

## Gradient Descent

## Backpropagation

# Your Arsenal

## Neurons

- sigmoid
- tanh
- ReLU

## Cost Functions

- quadratic cost
- cross-entropy

## Gradient Descent

## Backpropagation

## Layers

- dense
- softmax

# Your Arsenal

## Neurons

- sigmoid
- tanh
- ReLU

## Initialization

- Glorot

## Cost Functions

- quadratic cost
- cross-entropy

## Gradient Descent

## Backpropagation

## Layers

- dense
- softmax

# Your Arsenal

## Neurons

- sigmoid
- tanh
- ReLU

## Cost Functions

- quadratic cost
- cross-entropy

## Stochastic Gradient Descent

- mini-batch size
- learning rate
- second-order, e.g., Nadam

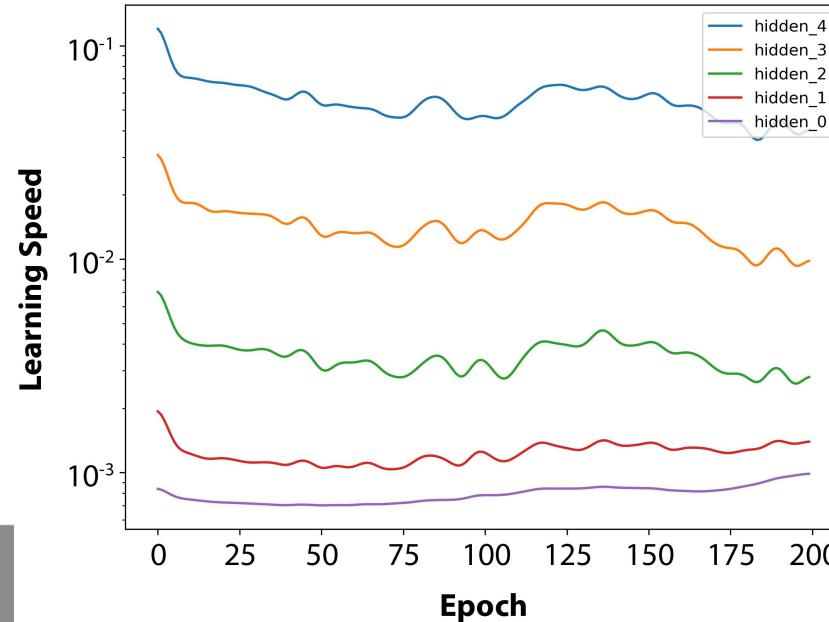

## Backpropagation

## Initialization

- Glorot

## Layers

- dense
- softmax

# Your Arsenal

## Neurons

- sigmoid
- tanh
- ReLU

## Cost Functions

- quadratic cost
- cross-entropy

## *Stochastic Gradient Descent*

- mini-batch size
- learning rate
- second-order, e.g., Nadam

## Backpropagation

## Initialization

- Glorot

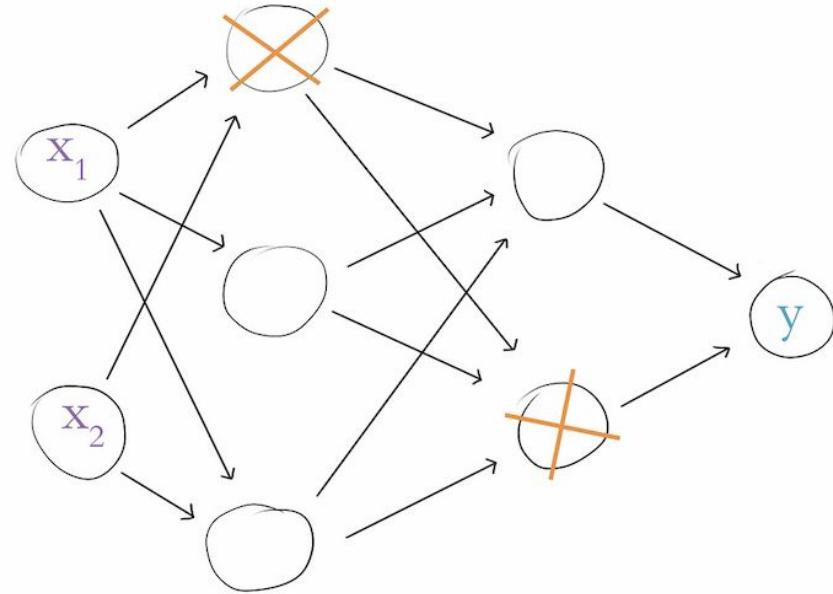

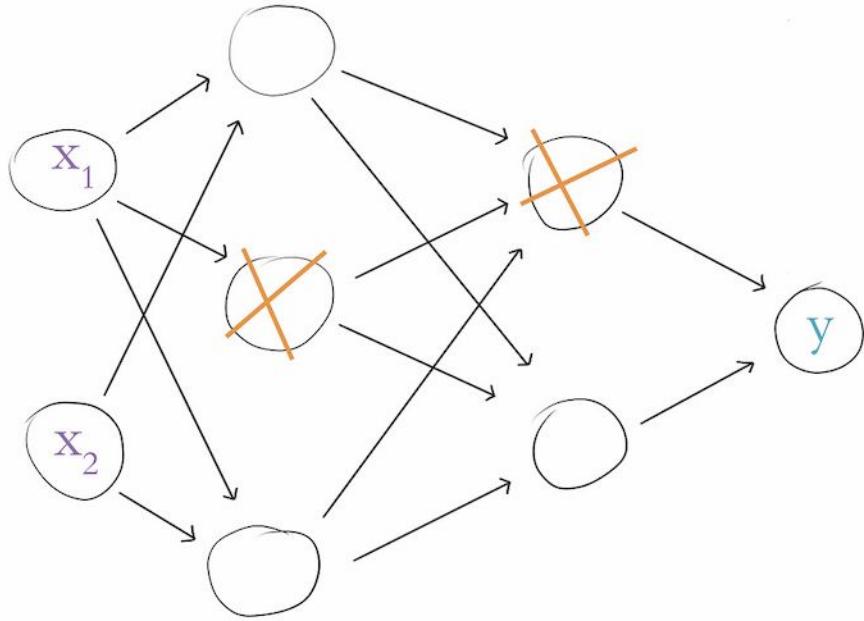

## Layers

- dense
- softmax

## Avoiding Overfitting

- Dropout

# Dropout

# Your Arsenal

## Neurons

- sigmoid
- tanh
- ReLU

## Cost Functions

- quadratic cost
- cross-entropy

## *Stochastic Gradient Descent*

- mini-batch size
- learning rate
- second-order, e.g., Nadam

## Backpropagation

## Initialization

- Glorot

## Layers

- dense
- softmax

## Avoiding Overfitting

- Dropout
- Data Augmentation

# TensorFlow Playground

**interactive demo:** [bit.ly/TFplayground](https://bit.ly/TFplayground)

# Deep Learning Fundamentals

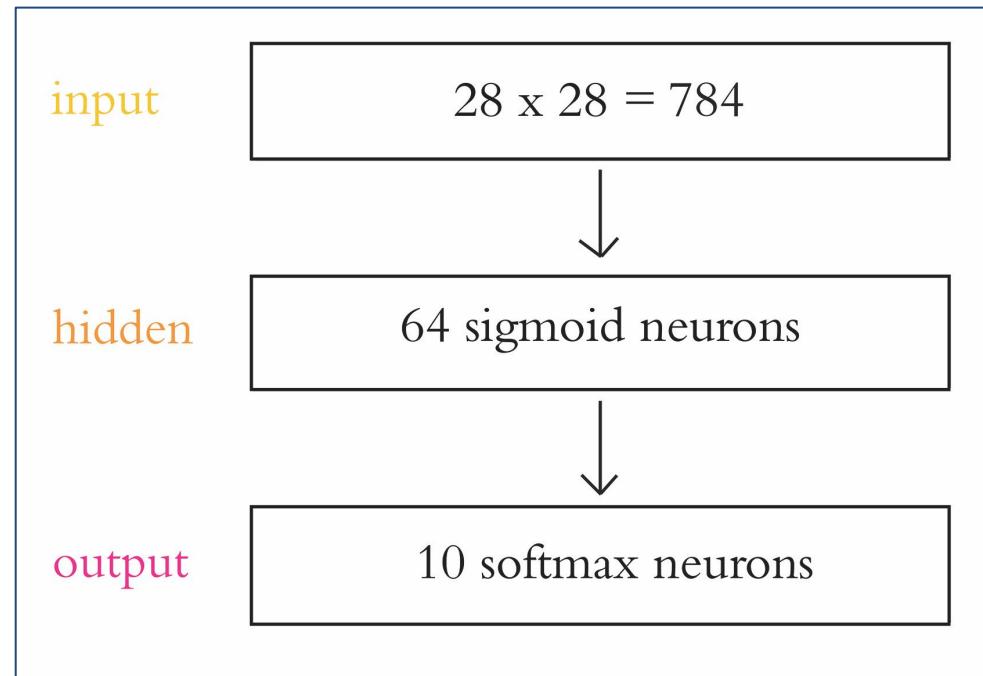

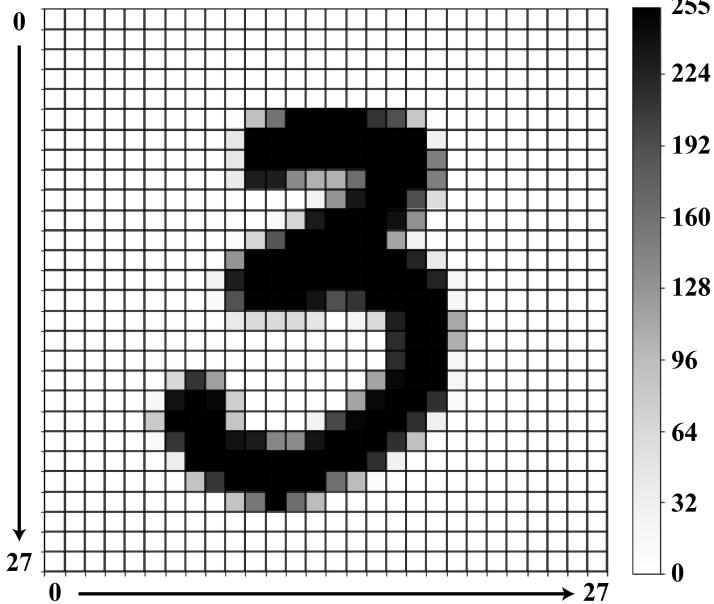

## Part 3:

### Deep Learning with TensorFlow

- Revisiting our Shallow Neural Network
- Deep Nets in TensorFlow (*Chapters 8-9*)
- What to Study Next, Depending on Your Interests

# Revisiting our Shallow Net

[interactive Colab demo: Shallow Net in TensorFlow](#)

# Deep Nets in TensorFlow

**interactive Colab demo:** *Deep Net in TF 2.0* ([bit.ly/deepNetTF](https://bit.ly/deepNetTF))

# POLL

What follow-up Deep Learning topics interest you most?

- CNNs and Machine Vision
- Sequences: RNNs, LSTMs, NLP, Financial Time Series
- Generative Adversarial Networks
- Deep Reinforcement Learning
- Something Else
